12.8 The span query 414

Sample data 415 ▪ The span_first query 416 ▪ The span_near query 417 ▪ The span_within query 418 ▪ The span_or query 420

12.9 Specialized queries 421

The distance_feature query 421 ▪ The pinned query 426 The more_like_this query 427 ▪ The percolate query 428

13 Aggregations 434

13.1 Overview 435

The endpoint and syntax 435 ▪ Combining searches and aggregations 436 ▪ Multiple and nested aggregations 436 Ignoring results 437

13.2 Metric aggregations 437

Sample data 438 ▪ The value_count metric 438 ▪ The avg metric 440 ▪ The sum metric 441 ▪ The min and max metrics 441 ▪ The stats metric 442 ▪ The extended_stats metric 443 ▪ The cardinality metric 444

13.3 Bucket aggregations 445

Histograms 446 ▪ Child-level aggregations 450 ▪ Custom range aggregations 451 ▪ The terms aggregation 453 The multi-terms aggregation 454

13.4 Parent and sibling aggregations 455

Parent aggregations 456 ▪ Sibling aggregations 457

13.5 Pipeline aggregations 458

Pipeline aggregation types 459 ▪ Sample data 459 Syntax for pipeline aggregations 459 ▪ Available pipeline aggregations 461 ▪ The cumulative_sum parent aggregation 462 ▪ The max_bucket and min_bucket sibling pipeline aggregations 464

14 Administration 467

14.1 Scaling the cluster 468

Adding nodes to the cluster 469 ▪ Cluster health 470 Increasing read throughput 473

14.2 Node communication 474

14.3 Shard sizing 475

Setting up a single index 475 ▪ Setting up multiple indexes 476
