14.4 Snapshots 477

Getting started 478 ▪ Registering a snapshot repository 479
Creating snapshots 481 ▪ Restoring snapshots 482
Deleting snapshots 483 ▪ Automating snapshots 483

14.5 Advanced configurations 488

The main configuration file 488 ▪ Logging options 488
Java virtual machine options 490

14.6 Cluster masters 491

Master nodes 491 ▪ Master elections 491 ▪ Cluster state 492
A quorum 493 ▪ The split-brain problem 493 ▪ Dedicated master nodes 494

15 *Performance and troubleshooting 497*

15.1 Search and speed problems 498

Modern hardware 498 ▪ Document modeling 499
Choosing keyword types over text types 501

15.2 Index speed problems 503

System-generated identifiers 503 ▪ Bulk requests 503
Adjusting the refresh rate 503

15.3 Unstable clusters 506

Cluster is not GREEN 506 ▪ Unassigned shards 507
Disk-usage thresholds 509

15.4 Circuit breakers 511

15.5 Final words 512

appendix A Installation 515

appendix B Ingest pipelines 523

appendix C Clients 530
