- *docker*—Docker files to run the services on the local environment. For example, elasticsearch-docker-8-6-2.yml hosts two services: Elasticsearch and Kibana. So when you execute the `docker-compose up` command, it starts both Elasticsearch and Kibana in the Docker container.
- *appendices*—Given the pace of Elasticsearch development, this book will need to be updated. New features will be provided as appendixes to the book on GitHub. I will add and modify content as new releases surface.

Elasticsearch releases occur pretty frequently—we were on version 7.x when I started writing this book, and the version was 8.7 as the book was preparing to go to print. And I expect a few more major and minor releases from Elastic by the time you read this! It would be a huge task to update the code base whenever a new release comes out. I will try to keep the code updated, but I will also be more than happy for contributors to maintain the codebase. So, please reach out to me if you'd like to be a contributor to this project.

This book contains many examples of source code, both in numbered listings and in line with normal text. In both cases, source code is formatted in a `fixed-width font like this` to separate it from ordinary text.

In many cases, the original source code has been reformatted; we've added line breaks and reworked indentation to accommodate the available page space in the book. In rare cases, even this was not enough, and listings include line-continuation markers (➥). Additionally, comments in the source code have often been removed from the listings when the code is described in the text. Code annotations accompany many of the listings, highlighting important concepts.

liveBook discussion forum

Purchase of *Elasticsearch in Action, Second Edition* includes free access to liveBook, Manning's online reading platform. Using liveBook's exclusive discussion features, you can attach comments to the book globally or to specific sections or paragraphs. It's a snap to make notes for yourself, ask and answer technical questions, and receive help from the author and other users. To access the forum, go to https://livebook.manning.com/book/elasticsearch-in-action-second-edition. You can also learn more about Manning's forums and the rules of conduct at https://livebook.manning.com/discussion.

Manning's commitment to our readers is to provide a venue where a meaningful dialogue between individual readers and between readers and the author can take place. It is not a commitment to any specific amount of participation on the part of the author, whose contribution to the forum remains voluntary (and unpaid). We suggest you try asking the author some challenging questions lest his interest stray! The forum and the archives of previous discussions will be accessible from the publisher's website as long as the book is in print.
