2.2 Retrieving data 30

Counting documents 31 ▪ Retrieving documents 31

2.3 Full-text search 36

Match query: Books by an author 36 ▪ Match query with the AND operator 37 ▪ Indexing documents using the _bulk API 39 Searching across multiple fields 41 ▪ Boosting results 42 Search phrases 42 ▪ Phrases with missing words 44 Handling spelling mistakes 44

2.4 Term-level queries 45

The term query 46 ▪ The range query 47

2.5 Compound queries 47

Boolean (bool) query 48 ▪ The must clause 49 ▪ The must_not clause 50 ▪ The should clause 51 ▪ The filter clause 51

2.6 Aggregations 52

Metrics 53 ▪ Bucket aggregations 56

3 Architecture 60

3.1 A high-level overview 61

Data in 62 ▪ Processing data 63 ▪ Data out 66

3.2 The building blocks 67

Documents 67 ▪ Indexes 71 ▪ Data streams 72 ▪ Shards and replicas 74 ▪ Nodes and clusters 81

3.3 Inverted indexes 86

3.4 Relevancy 89

Relevancy scores 89 ▪ Relevancy (similarity) algorithms 90

3.5 Routing algorithm 96

3.6 Scaling 97

Scaling up (vertical scaling) 97 ▪ Scaling out (horizontal scaling) 98

4 Mapping 100

4.1 Overview of mapping 101

Mapping definition 102 ▪ Indexing a document for the first time 103

4.2 Dynamic mapping 104

The mechanism for deducing types 105 ▪ Limitations of dynamic mapping 107
