4.3 Explicit mapping 109

Mapping using the indexing API 110 ▪ Updating schema using the mapping API 112 ▪ Modifying existing fields is not allowed 113 ▪ Type coercion 114

4.4 Data types 115

4.5 Core data types 118

The text data type 118 ▪ The keyword data types 122
The date data type 124 ▪ Numeric data types 127
The boolean data type 127 ▪ The range data types 128
The IP address (ip) data type 130

4.6 Advanced data types 131

The geo_point data type 131 ▪ The object data type 134
The nested data type 138 ▪ The flattened data type 140
The join data type 142 ▪ The search_as_you_type data type 144

4.7 Fields with multiple data types 146

5 *Working with documents 149*

5.1 Indexing documents 150

Document APIs 151 ▪ Mechanics of indexing 158
Customizing the refresh process 160

5.2 Retrieving documents 161

Using the single-document API 162 ▪ Retrieving multiple documents 163 ▪ The ids query 165

5.3 Manipulating responses 166

Removing metadata from the response 166 ▪ Suppressing the source document 167 ▪ Including and excluding fields 167

5.4 Updating documents 170

Document update mechanics 170 ▪ The _update API 171
Scripted updates 173 ▪ Replacing documents 177
Upserts 178 ▪ Updates as upserts 179 ▪ Updating with a query 180

5.5 Deleting documents 181

Deleting with an ID 181 ▪ Deleting by query (_delete_by_query) 182 ▪ Deleting with a range query 183
Deleting all documents 184

5.6 Working with documents in bulk 185

Format of the _bulk API 185 ▪ Bulk indexing documents 186
Independent entities and multiple actions 188 ▪ Bulk requests using cURL 189
