5.7 Reindexing documents 190

6 *Indexing operations 192*

6.1 Indexing operations 193

6.2 Creating indexes 193

Creating indexes implicitly (automatic creation) 194 Creating indexes explicitly 198 ▪ Indexes with custom settings 198 ▪ Indexes with mappings 201 ▪ Index with aliases 202

6.3 Reading indexes 207

Reading public indexes 207 ▪ Reading hidden indexes 208

6.4 Deleting indexes 209

6.5 Closing and opening indexes 210

Closing indexes 210 ▪ Opening indexes 211

6.6 Index templates 212

Creating composable (index) templates 213 ▪ Creating component templates 215

6.7 Monitoring and managing indexes 216

Index statistics 217 ▪ Multiple indexes and statistics 218

6.8 Advanced operations 220

Splitting an index 220 ▪ Shrinking an index 222 ▪ Rolling over an index alias 224

6.9 Index lifecycle management (ILM) 227

Index lifecycle 228 ▪ Managing the index lifecycle manually 229 ▪ Lifecycle with rollover 231

7 *Text analysis 235*

7.1 Overview 236

Querying unstructured data 237 ▪ Analyzers to the rescue 238

7.2 Analyzer modules 238

Tokenization 238 ▪ Normalization 239 ▪ Anatomy of an analyzer 239 ▪ Testing analyzers 241

7.3 Built-in analyzers 243

The standard analyzer 244 ▪ The simple analyzer 251 The whitespace analyzer 251 ▪ The keyword analyzer 252 The fingerprint analyzer 253 ▪ The pattern analyzer 254 Language analyzers 256
