node communication 474–475
scaling clusters 468–474
shard sizing 475–477
snapshots 477–487
aggregations 52–58, 434–466
components of 67–86
compound queries 47–52, 361–396
development of 8
documents 149–191
full-text search 36–45
high-level architecture 61–67
indexes 192–234
installing 515–520
downloading binary 515–516
installing via Docker 519
starting up on macOS 518–519
starting up on Windows 516–518
testing server with _cat API 519–520
mapping 100–148
misconceptions regarding 15–16
overview 9–10
performance and troubleshooting 497–514
circuit breakers 511–512
index speed problems 503–506
search and speed problems 498–502
unstable clusters 506–511
popular adoption of 16
priming 21–30
indexing documents 23–26
online bookstore example 21–23
relevancy 89–90
retrieving data 30–36
routing algorithm 96–97
scaling 97
search 280, 312, 397–433
anatomy of requests 288–290
anatomy of responses 290–291
features of 297–312
full-text search 334–360
functionality of 282–283
fundamentals of 285–288
location search 398–401
overview 281–282
Query DSL 294–297
sample data 283–285
shape query 412–414
span queries 414–421
specialized queries 421–432
term-level search 313–333
URI request searches 291–294
term-level queries 45–47
text analysis 235–279
use cases 12–13
business analytics 13
logging and application monitoring 13
search engine 12–13
security analytics and threat and fraud detection 13
unsuitable uses 13–14
ElasticsearchClient class 538
ElasticsearchClient Java API client 534
ElasticsearchClient-related classes 531
elasticsearchClient.index() method 538
ElasticsearchFEATUREClient client 533
ElasticsearchIndicesClient client 533–534, 536
ElasticsearchTransport object 533
em tag 44
email property 122
emails index 135
end attribute 417
english analyzer 242, 256–258
Enterprise Search 13
erm query 391
es_cluster_snapshot_repository repository 479, 481
ES_PATH_CONF variable 475, 488
escaped_tags array 266
escaped_tags option 267
ETL (extract, transform, load) tools 62, 185, 523
Evan, Ben 490
excludes array 310
exists query 47, 315, 322–323
expensive queries 327
expire_after attribute 485
explain API 303–304
explain attribute 301–303
explain flag 301–303
explain parameter 293
explicit index creation 194, 198
explicit mapping 109–115
modifying existing fields 113–114
type coercion 114–115
using indexing API 110–112
using mapping API
updating empty indexes 113
updating schema 112–113
Extended stats (extended_stats) 461
extended_stats aggregation 438
extended_stats function 443
extended_stats metric 443

F

factor attribute 393
failed attribute 291
failed flag 291
false negatives 336
false positives 336
field data cache 108
Field data circuit breaker 512
field_value_factor function 393–394
field-length norm 93
