field-level analyzers
  specifying for indexes 262
  specifying for search 264
fields array 358
fields object 147, 308
fields parameter 355, 428
filename property 134
filetype property 134
filter attribute 258
filter clause 51–52, 378–381
filter context 52, 287–288
filter query 286, 378, 380, 384–385
fingerprint analyzer 253–254
fingerprint token filter 253
first mode 395
fixed interval 449
fixed_interval 448–450
flattened data type 140–142
float data type 46, 105, 114
float_range data type 128
float_range range 130
float, double type 116
Floating-point types integer type 127
flood-stage-disk watermark 510–511
form attribute 289
found attribute 162
found* tag 347
fraud detection 13
from attribute 293, 299, 452
from parameter 299
FULFILLED state 317
full-text data type 118
full-text search 36–45, 334–360
  boosting results 42
  fuzzy queries 357
  indexing documents using _bulk API 39–41
  match phrase query
    overview 42–43
    phrases with missing words 44
  match queries 340–345
    analyzing 342
    books by author 36
    fixing typos using fuzziness keyword 344–345
    format of 340–341
    matching at least a few words 343–344
    searching for multiple words 342–343
    searching using 341
    with AND operator 37–39
  match_all query 338–339
    building 338–339
    short form of 339
  match_none query 339–340
  match_phrase query 345–346
  match_phrase_prefix query 346–347
  multi_match query 347–352
    best fields 348–349
    boosting individual fields 351–352
    dis_max query 350
    tiebreakers 350–351
  overview 335–338
  precision 335–336
  query_string query 353–356
    default operators 355
    fields in 354–355
    with phrases 356
  recall 336–338
  sample data 338
  searching across multiple fields 41–42
  simple_query_string query 357–359
  spelling mistakes 44–45
Function score (function_score) query 365
function_score query 389–395
  combining function scores 394–395
  field_value_factor function 393–394
  random_score function 391–392
  script_score function 392–393
fuzziness attribute 332
fuzziness keyword 344–345
fuzziness parameter 344
fuzziness principle 331
fuzziness setting 44
fuzzy queries 330–332, 357
