Levenshtein distance algorithm 331
Levenshtein edit distance algorithm 44
lifecycle policy 228
like parameter 428
Line string shape 404
LLM (large language model) 17
location search 398–401
  bounding_box query 398–399
  geo_distance query 399
  geo_shape query 400–401
  geospatial data types 401–404
    geo_point data type 401–402
    geo_shape data type 402–404
  geospatial queries 404–412
    geo_bounding_box query 405–409
    geo_distance query 409–410
    geo_shape query 410–412
lockdown condition 340
logging
  advanced configuration options 488–490
  application monitoring and 13
Logstash 12
lon (longitude) 132
long data type 46, 106, 115, 118, 431
low-disk watermark 509
lowercase filter 245–246, 253–254, 342
lowercase tokenizer 251, 274
lt (less than) operator 128, 323
lte (less than or equal to) operator 323, 325

M

Machine learning node role 84
macOS
  installing Elasticsearch 518–519
  installing Kibana 522
main configuration file 488
make attribute 201
manipulating results 307–310
mapping 100–148
  creating indexes 201–202
  data types 115–117
    advanced 131–146
    boolean data type 127–128
    date data type 124–126
    fields with multiple 146–147
    ip data type 130–131
    keyword 122–124
    numeric 127
    range 128–130
    text data type 118–122
  dynamic 104–109
    limitations of 107–109
    mechanism for deducing types 105–107
  explicit 109–115
    modifying existing fields 113–114
    type coercion 114–115
    using indexing API 110–113
  files containing mappings 268–269
  indexing documents 103–104
  mapping definition 102
  overview 101–104
mapping character filter 267–268
mapping filter 266–267
mapping object 102
mappings object 110, 113, 117
Master node role 84
master role 85, 491, 494–495, 524
master-eligible node 491
match attribute 182, 303
match function 538
match phrase query
  overview 42–43
  phrases with missing words 44
match queries 340–345
  analyzing 342
  books by author 36
  fixing typos using fuzziness keyword 344–345
  format of 340–341
  matching at least a few words 343–344
  searching for multiple words 342–343
  searching using 341
  with AND operator 37–39
match_all object 338
match_all query 35, 184, 338–339
  building 338–339
  short form of 339
match_none query 339–340
match_only_text type 116, 120
match_phrase query 42, 44, 50, 345–346
match_phrase_prefix query 346–347
match/term queries 430
matched_queries object 383
MatchQuery.Builder object 538
Maven/Gradle project setup 531–532
max aggregation 53, 55, 436
Max bucket (max_bucket) 462
max function 435
max mode 395
max_bucket aggregation 464–465
max_gram attribute 273
max_score property 291
max_token_length attribute 270
max_token_length size 271
maximum metric 442
maximum_count setting 487
metadata attribute 482
metadata, removing from responses 166
metric aggregations 53–56, 437–445
  avg metric 440–441
  cardinality metric 444–445
  extended_stats metric 443
