online bookstore example
  match query to find books by author 36
  overview 21–23
operator parameter 38
Optimizing Java (Evan and Gough) 490
OR Boolean operator 343
OR operator 38, 292–293, 343–344, 353, 355, 373–374, 420–421
Orders type 70
orders_new index 114
org.elasticsearch.http package 490
org.elasticsearch.index package 489–490
outer hits object 291

P

pagination 298–299
pan_near query 419
pan_within query type 418
params attribute 176
params flag 177
params object 177
params property 176
parent aggregations 456
Parent circuit breaker 512
parent_id search query 144
path_hierarchy tokenizer 243, 274
path.data parameter 84
path.data variable 63
path.logs parameter 84
path.repo property 479
pattern analyzer 236, 243, 254–255, 262
pattern attribute 255
pattern filter 266
pattern tokenizer 254, 274
pattern_replace character filter 240, 269–270
patterns 255
PDFs, loading into Elasticsearch 527–529
Percentiles bucket (percentiles_bucket) 462
percolate query 428–432
percolator field type 429
percolator index 430–432
percolator query 398
percolator type 431
performance and troubleshooting 497–514
  circuit breakers 511–512
  index speed problems 503–506
    adjusting refresh rate 503–506
    bulk requests 503
    system-generated identifiers 503
  search and speed problems 498–502
    choosing keyword types over text types 501–502
    document modeling 499–501
    modern hardware 498–499
  unstable clusters 506–511
    cluster health 506–507
    disk-usage thresholds 509–511
    unassigned shards 507–509
persistent properties 196, 490
phone_number attribute 112
phrase multi-match query 349
phrase_prefix multi-match query 349
phrase_slop parameter 356
phrase_slop setting 356
pinned queries 398, 426–427
pipeline aggregations 458–465
  available 461–462
  cumulative_sum parent aggregation 462–464
  max_bucket aggregation 464–465
  min_bucket aggregation 465
  sample data 459
  syntax for 459–461
  types of 459
pipelines 524
Point shape 404
point, geospatial 404
Polygon shape 404
positive part 386
POST /_refresh command 161
POST action 154
POST HTTP verb 151
POST method 29, 154–156, 171, 185, 289, 537
POST request 154, 185
precision percentage 282
prefix queries 37, 327–330
  shortened 328–329
  speeding up 329–330
prefix term-level query 47
prices nested object 23
primaries bucket 217–218
primary shards 72, 473
priming with data 21–30
  indexing documents 23–26
    constituents of requests 29–30
    cURL 24–26
    document APIs 23–24
    process for 26–30
  online bookstore example 21–23
private classification 139
processing data 63–66
  analyzing data 64–66
  collecting data 63
  types of data 64
processors 524
prod_cluster_daily_backups policy 487
products definition 363
products index 362–363, 367
profiles index 427
properties object 102, 112–113
public indexes, reading 207–208
PUT command 110
