PUT HTTP verb 151
PUT method 29, 151–156
PUT request 155, 177

Q

queries object 389
query context 286–287
Query DSL 182, 294–297
  for aggregations 296
  for cURL 295–296
  leaf and compound queries 296–297
  sample query 295
  URI request searches 294
query object 33, 36, 41, 43, 49, 53, 290, 295–297, 300, 302, 311, 346, 364, 368, 435
query parameter 353
query requests 281
query_string method 294
query_string queries 335, 352–358
  default operators 355
  fields in 354–355
  with phrases 356
queue_size attribute 505
quorum 493
quote property 415
quotes index 415

R

random_score function 391–392
range aggregation 436
range aggregation bucket type 58
range attribute 182
range bucketing aggregation 57
range buckets 57–58
range data types
  date_range type 128–130
  overview 128–130
range queries 327, 368–369, 373
  deleting documents with 183–184
  term-level search 47, 323–325
range term-level query 315
recall percentage 282
refresh process
  adjusting refresh rate 503–506
  customizing 160–161
    client-side refresh controls 161
    configuring refresh cycle 160–161
refresh query parameter 161
registration_year attributes 201
reindexing 97, 113
relation attribute 411
relations attribute 142
relations object 142
relationship object 143
relationship property 142
relevancy 4, 89–90
  relevancy (similarity) algorithms 90–96
    configuring 94–96
    Okapi BM25 algorithm 92–94
  relevancy scores 89–90, 301–304
    _explain API 303–304
    explain flag 301–303
    sorting on 304–307
remove method 173
remove operation 180
replacing documents 177–178
replica shards 72, 473
  distribution of 76–79
  overview 74–75
replicas 72
replication group 283
Request circuit breaker 512
RestClient builder 532
restClient instance 533
restClient object 532
result attribute 153–154, 182
result property 28
retrieving data 30–36
  counting documents 31
  retrieving documents 31–36, 161–166
    ids query 165–166
    retrieving all documents 34–36
    retrieving multiple documents 33–34, 163–165
    retrieving single documents 32–33, 162–163
reverse filter 274
rollover action 232
rollover operations
  aliases 224–227
    creating for rollover operations 225
    issuing rollover operations 225–227
  index lifecycle with 231–234
routing algorithm 96–97

S

same_shard decider 471
scaling 97
  horizontal 98, 477
  scaling clusters 468–474
    adding nodes to clusters 469–470
    cluster health 470–473
    increasing read throughput 473–474
  vertical 97–98, 477
schema-less 30
schema-less feature 69
scoped aggregations 436
score_mode attribute 395
Script compilation circuit breaker 512
