settings 195
settings component 247
settings object 199, 255, 479
shape data type 412
shape queries 398, 412–414
shape type 412
shards 74–81
  distribution of 76–79
  rebalancing 79–80
  sizing 80–81, 475–477
    setting up multiple indexes 476–477
    setting up single index 475–476
  unassigned 507–509
shingle filter 275–276
should clause 51, 373–378
  boosting score 374–377
  filter clause 378–381
  minimum_should_match setting 377–378
should query 51, 374
sibling aggregations 457–458
SIEM (security information and event management) tool 11
similarity algorithms 94
similarity module 90–91
simple analyzer 236, 242–243, 251–252, 265
simple_query_string query 357–359
single-document APIs 162–163
single-node cluster 75, 81, 469
Site Search 13
size attribute 289, 293, 298–299
size parameter 298–299, 437, 454
SLM (snapshot lifecycle management) 484
  manually executing 487
  using Kibana 485–487
slop attribute 346, 418
slop keyword 347
slop parameter 44, 345–346, 356
snapshots 477–487
  automating 483–487
    manually executing 487
    using Kibana 485–487
  creating 481–482
  deleting 483
  overview 478–479
  registering snapshot repositories 479–481
    on Kibana 480–481
    using snapshot APIs 479–480
  restoring 482
Software tag 51
solid state drives (SSDs) 498
sort attribute 324
sort object 304
source element 309
source filtering 309–310
source key 173
span queries 398, 414–421
  sample data 415
  span_first query 416–417
  span_near query 417–418
  span_or query 420–421
  span_within query 418–420
span_containing span query 421
span_first query 416–417
span_multi_term span query 421
span_near query 417–418
span_not span query 421
span_or query 420–421
span_term queries 418
span_term query 416
span_within queries 418–420
spelling mistakes 44–45
split API 220
split-brain problem 493–494
SSDs (solid state drives) 498
