SEARCH / SOFTWARE ENGINEERING

Elasticsearch IN ACTION Second Edition

Madhusudhan Konda • Foreword by Shay Banon

Create fully professional-grade search engines with Elasticsearch and Kibana! Rewritten for the latest version of Elasticsearch, this practical book explores Elasticsearch's high-level architecture, reveals infrastructure patterns, and walks through the search and analytics capabilities of numerous Elasticsearch APIs.

Elasticsearch in Action, Second Edition teaches you how to add modern search features to websites and applications using Elasticsearch 8. In it, you'll quickly progress from the basics of installation and configuring clusters, to indexing documents, advanced aggregations, and putting your servers into production. You'll especially appreciate the mix of technical detail with techniques for designing great search experiences.

What's Inside

- Understanding search architecture
- Full text and term-level search queries
- Analytics and aggregations
- High-level visualizations in Kibana
- Configure, scale, and tune clusters

For application developers comfortable with scripting and command-line applications.

Madhusudhan Konda is a full-stack lead engineer, architect, mentor, and conference speaker. He delivers live online training on Elasticsearch and the Elastic Stack.

"Madhu's passion comes across in the depth and breadth of this book, the enthusiastic tone, and the hands-on examples. I hope you will take what you have read and put it 'in action'."

—From the Foreword by Shay Banon, Founder of Elasticsearch

"Practical and well-written. A great starting point for beginners and a comprehensive guide for more experienced professionals."

—Simona Russo, Serendipity

"The author's excitement is evident from the first few paragraphs. Couple that with extensive experience and technical prowess, and you have an instant classic."

—Herodotos Koukkides and Semi Koen, Global Japanese Financial Institution
