analyzer attribute 246
analyzers 238–243
  anatomy of 239–241
  built-in 243–258
    fingerprint analyzer 253–254
    keyword analyzer 252–253
    language analyzers 256–258
    pattern analyzer 254–255
    simple analyzer 251
    standard analyzer 244–250
    whitespace analyzer 251–252
  components of
    character filters 265–270
    token filters 274–278
    tokenizers 270–274
  custom
    advanced customization 260–261
    overview 258–261
  normalization 239
  overview 238
  specifying 261–265
    for indexing 261–263
    for searching 263–265
  testing 241–243
    configuring analyzers on fly 242–243
    explicit analyzer tests 242
  tokenization 238–239
anchor date 324
AND operator 37–39, 293, 343, 353, 355
AND/OR operator 345
Apache Solr 8–9
App Search 12
array data type 139
artificial intelligence (AI) tools 2, 16
attachment object 529
attachment processor 527–528
attachments data type 135
attachments inner object 134
attachments object 134–135
attachments property 134
author object 38
author property 22, 415
author/title keys 455
AUTO setting 332, 344
Average (avg_bucket) 461
avg aggregation 53
avg declaration 440
avg function 435, 440
avg metric 440–441
avg mode 395
avg_rating_per_bucket bucket 451

B

base64 module 528
BBOX (bounding-box queries) 408
Beats 12
best_fields algorithm 349
best_fields type 348–349, 351
best-fields strategy 389
binary data type 115
BKD (Block k-dimensional) 87, 102
Bloch, Joshua 23, 49–50
blockbuster flag 175
BM25 (Best Match 25) algorithm 41, 89, 91, 94–95, 390
bool compound query 371
bool declaration 368
bool object 368
bool query 48–49, 365–384
  combining all clauses 381–382
  must clause 367–369
  must_not clause 370–373
  named 382–384
  should clause 373–378
    boosting score 374–377
    filter clause 378–381
    minimum_should_match setting 377–378
  structure of 366–367
bool search compound query 136
Boolean (bool) query 297, 365
boolean data type 127–128, 439
boolean similarity algorithm 94
boolean type 116
boost attribute 385
Boost parameter 35, 339
boost_mode parameter 395
Boosting (boosting) query 365
boosting query 386–388, 397
bottom_right attribute 407–408
bottom_right coordinate 405–406
bottom_right geopoint 132
bottom_right parameter 407
bounding_box query 398–399
bounding-box queries (BBOX) 408
bucket aggregations 56–58, 445–455
  child-level aggregations 450–451
  custom range aggregations 451–453
  histograms 56–57, 446–450
    date histogram 447–448
    interval setup for date histogram 448–450
  multi-terms aggregation 454–455
  range buckets 57–58
  terms aggregation 453–454
Bucket correlation (bucket_correlation) 461
Bucket count (bucket_count_ks_test) 461
Bucket selector (bucket_selector) 461
Bucket sort (bucket_sort) 461
